Level of Extinction

Cut out and place each level of extinction in its correct order from Extinct to Least Concern.

☐	The species no longer exist.
☐	The species is extinct in its natural habitat. Individuals still exist in captivity (such as in a zoo) or cultivation (such as in a botanic garden)
☐	Extremely high risk of extinction in the wild.
☐	Very high risk of extinction in the wild.
☐	High risk of extinction in the wild.
☐	At risk of extinction if the population continues to decline.
☐	The population is abundant and not under threat.

Critically Endangered	Least Concerned	Near Threatened	Extinct	Entinct in the Wild	Endangered	Vulnerable
