What's your **FAVORITE** color?

Correcting Information

The sky is blue.

Actually, it isn't blue.

As a matter of fact, the light from the sun is lots of colors.

In fact, we see blue because blue light rays are shorter than light rays of other colors.

After all, the sky changes from blue to red when the sun sets in the evening.

Read and complete the dialogue.

When you see your favorite food on a red plate, you probably feel hungry. But you feel _____ when it's on a white plate. Why? Research shows that colors can really affect our feelings about food. For example, when you add red dye to water, it tastes _____ than normal water, as if you've added sugar. The food that you think is the _____ will probably taste _____ to you if you change its color to blue. This is because blue is a very unnatural color for food.

Color can also affect how much we eat. In one experiment, people were asked to serve themselves some pasta with white sauce. The people with red plates took a small portion, while the people with white plates took a much _____ portion. Can you guess why this happens?
