

Solving Equations w/Variables on Both Sides Extra Practice

Solve the following equations:

$$1) n - 3n = 14 - 4n$$

$$2) -7x - 3x + 2 = -8x - 8$$

$$3) 13 - 4x = 1 - x$$

$$4) 7a - 3 = 3 + 6a$$

$$5) 8(y + 4) = 38 + 8y$$

$$6) 3(1 - 3x) = 2(-4x + 7)$$
