

Geometria Plana

Área e perímetro

Arraste a fórmula da área e do perímetro das figuras planas abaixo e coloque na figura correspondente.

$$\text{Área} = \frac{b \cdot h}{2}$$

$$\text{Área} = L^2$$
$$\text{Perímetro} = 4L$$

$$\text{Área} = \frac{D \cdot d}{2}$$
$$\text{Perímetro} = 4L$$

$$\text{Área} = \frac{(B + b) \cdot h}{2}$$
$$\text{Perímetro} = B + b + l_1 + l_2$$

$$\text{Área} = b \cdot h$$
$$\text{Perímetro} = 2(b + h)$$

$$\text{Área} = \pi r^2$$
$$\text{Perímetro} = 2\pi r$$
