

# Fly Guy presents: Space

1) Solve these two puzzles by dragging and dropping the little images

What's its name?

What's his name?

2) Complete these sentences according to what they learned about planets, moons and stars. Here you have a helping box. There is one extra answer.

small – orbit – planets – biggest – gravity

- There are eight \_\_\_\_\_ in the Solar System.
- Moons \_\_\_\_\_, or travel around, the planets. Earth has one moon.
- All objects orbit around the Sun because it has \_\_\_\_\_.
- Stars are huge balls of burning gas. Stars only look \_\_\_\_\_ because they are so far away.

3) True or false? (Write down "T" or "F".)

- Astronauts are people who travel into roller coasters.
- Astronauts wear special clothes to keep them safe.
- Astronauts can't live in space stations.

4) Match the pictures and the descriptions of the objects.

Space suits keep astronauts safe, warm or cool and let them breathe.

A space shuttle uses rockets to blast off. It's a vehicle that travels in space.

Mars rovers are robots that explore Mars.

A telescope is a tool that uses lenses and mirrors to make faraway objects look nearer.
