

## EXCRETORY SYSTEM

Expels waste from the body.

The **URINARY SYSTEM** is responsible for removing \_\_\_\_\_ from our body.

The **KIDNEYS** filter the \_\_\_\_\_ and separate the waste and \_\_\_\_\_.

Water and waste forms \_\_\_\_\_

The **URINE** goes down two tubes called \_\_\_\_\_ to the \_\_\_\_\_.

When the **BLADDER** is full, you must go to the \_\_\_\_\_.

The **BLADDER** releases **URINE** through the \_\_\_\_\_.

**SWEAT** is a mixture of \_\_\_\_\_ and \_\_\_\_\_.

When your body is too hot, **SWEAT GLANDS** produce \_\_\_\_\_.
