

NAME: _____

PASSAGE 2: KEEPING CLEAN

To keep clean, children must take a bath every day. A towel, soap and water should be used when bathing. Germs are all around. Germs make you sick.

Sue dislikes being unclean. So she practices hygiene. She takes a bath every day to help prevent germs from entering her body. She likes to bathe in warm water with her favorite soap. She always washes her hands before meals and after using the bathroom. When Sue plays with her pets or plays outside she remembers to wash her hands. To keep her hair clean, Sue's mom washes it once a week with shampoo and clean water. Sue combs, brushes, and oils her hair daily to keep it soft and neat. A clean body will help Sue to stay healthy.
