

1. Calcula la fracción generatriz

$$a) 12, \widehat{079} = \frac{\boxed{}}{\boxed{}}$$

$$b) 0, \widehat{0134} = \frac{\boxed{}}{\boxed{}}$$

$$c) -6, \widehat{103} = \frac{\boxed{}}{\boxed{}}$$

2. Calcula pasando previamente a fracción:

$$d) 3, \widehat{42} + 7, \widehat{6} = \frac{\boxed{}}{\boxed{}} + \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$b) 0, \widehat{12} - 0,2 = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$c) 6, \widehat{17} - 3, \widehat{82} = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$
