

## Quiz 2 – LE V\_TERM 2

### Part 1

Read the article about gold facts and decide if the statements (1 – 5) are True or False. Choose the best answer for each statement.

#### Facts about Gold

##### What Is Gold?

Gold is a very valuable, shiny metal which is usually yellow in color. It is one of the first metals people knew and used. It is believed that gold was first used in the Middle East, where the first known civilizations began. The first gold objects date back more than 6,000 years.

Gold, which was found in streams, became highly valued in human cultures around the world. It has been found in tombs and with artifacts that date back to the earliest civilizations. Countries around the world used it as money for hundreds of years. Egyptians used gold as money as early as 1,500 B.C.

##### Why is Gold so Valuable?

Gold is valuable for a number of reasons. Of course, it is beautiful. But gold is also a very easy metal to work with. It is soft and can be melted and shaped without difficulty. Gold doesn't rust. It is also difficult to find and there is not a large amount of it left on Earth.

##### How is Gold Used Today?

Today, most gold is used to make jewelry. However, because gold is so easy to work with and does not rust like other metals, lots of modern uses for gold have been discovered. Gold is used in lots of electronic devices like mobile phones, computers, printers, photocopiers, televisions and calculators. Gold parts have even been used in cars, in heart surgery and on space shuttles!

1. Gold was first used in the Middle West.
2. The first gold objects are dated six hundred years.
