Do dogs Have Personalities? / Lines 5-13 (Module C)

- 5 Dr. Kent believed that dogs *do not* have personalities. However, he decided to do his research because he knew that most dog owners are convinced that their dogs *do* have personalities. "Owners often use words such as 'friendly', 'stubborn', or 'aggressive' to describe their dog," says Dr. Kent. "The question is, does each dog really have its own special traits that make it different from other dogs?"
- 10 To answer this question, Dr. Kent carried out a study on dogs. In his study, he used research methods similar to those that helped him in his studies on human personality. These methods included observing behavior in different situations and filling in questionnaires.

Vocabulary:

- survey, study = _____
- since = _____
- sure = _____
- did a study = _____
- condition = _____
- way = _____
- a list of questions = _____
- frequently = _____
