

Guided Practice

Estimate. Round to the greatest place value. Circle whether the estimate is *greater than* or *less than* the actual product.

1. $9 \times \text{AED } 870$

$9 \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

greater than

less than

2. $3,293 \times 3$

$\underline{\hspace{2cm}} \times 3 = \underline{\hspace{2cm}}$

greater than

less than

Which product is closer to the estimate of 1,600: 4×385 or 4×405 ? Explain.
