

REPRODUCTIVE SYSTEM

FEMALE REPRODUCTIVE SYSTEM

The **ovaries** produce and store the female sex cell, **ova**.

The **fallopian tubes** connect the ovaries to the **uterus**

The **uterus** is where babies develop.

The **vagina** is a muscular tube. It connects the **uterus** to the outside of the body.

The **vulva** protects the outside of the vagina.

MALE REPRODUCTIVE SYSTEM

The **scrotum** is an external sac of skin which contains the **testicles**.

The **testicles** produce the male sex cell, called **sperm**

The **urethra** is a tube inside the **penis**

The **urethra** carries the **sperm** out of the body.
