

**Task I. - READING**

The World Wide Web is a wonderful resource, where people can communicate with each other using a wide variety of services. This technology encourages young people to communicate and share information and interests. A typical young person will use mobile and internet technologies every day. Young people will text friends at breakfast to meet up at the bus stop or use the internet to research some homework or discuss today's History topic with friends.

Sharing hobbies and interests is another activity. Using colour and images that show their own style, young people create their personal blogs where they write about what they do every day. They can easily take photos of themselves, family and friends on their mobiles and put them on their websites. Music on the internet is also very popular with young people. They download music tracks from the internet and watch videos online.

However, as much as young people enjoy the freedom that new technologies offer them, this online world is not completely safe. That's why teachers and parents have an important role to play in helping to make a safer online environment for young people. They must check that all sites used by young people are safe.

The opportunities for young people to use the internet and what it offers in a positive way are very good. That's why the internet is becoming more and more popular among the young generation.

**Read the text about young people and technology. Decide if the statements are True or False.**
