

**10**

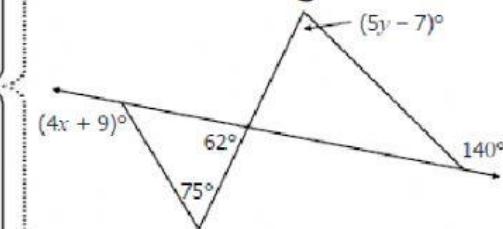

Find the value of  $x$  in the triangle below:

10.  $x = \underline{\hspace{2cm}}$

**15**

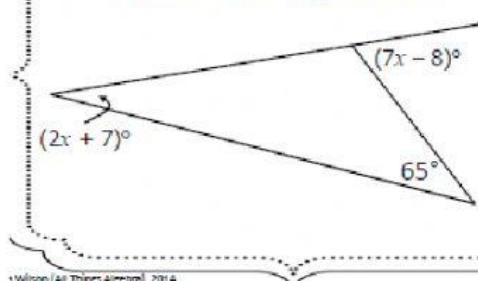

Find the value of  $x$  and  $y$  in the triangles below:

15.  $x = \underline{\hspace{2cm}}$        $y = \underline{\hspace{2cm}}$

**12**

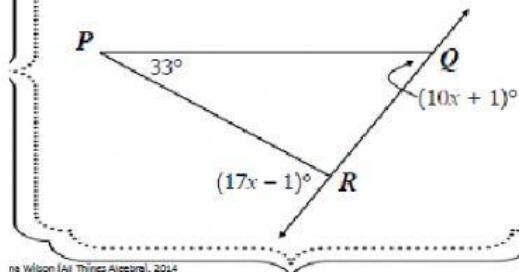

Find the value of  $x$  in the triangle below:

12.  $x = \underline{\hspace{2cm}}$

**16**

Find the measures of  $\angle PQR$  and  $\angle PRQ$  in the triangle below.

16.  $x = \underline{\hspace{2cm}}$

$PQR = \underline{\hspace{2cm}}$

$PRQ = \underline{\hspace{2cm}}$
