

PERÍMETRO

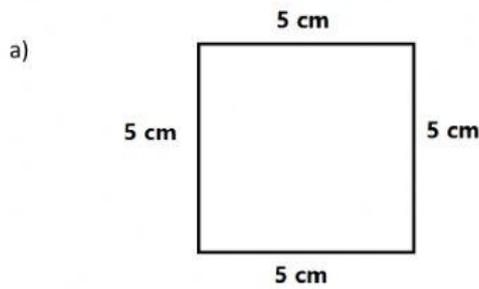

Recuerda!!!! El perímetro es la suma de todos los lados de una figura geométrica.

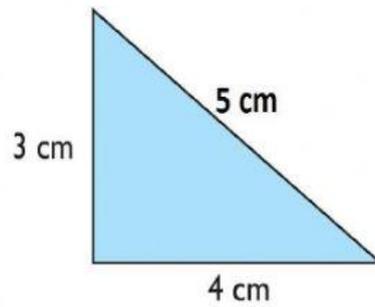

Ejemplo:

$$P = 6\text{cm} + 6\text{cm} + 6\text{cm} + 6\text{cm} = 24\text{cm}$$

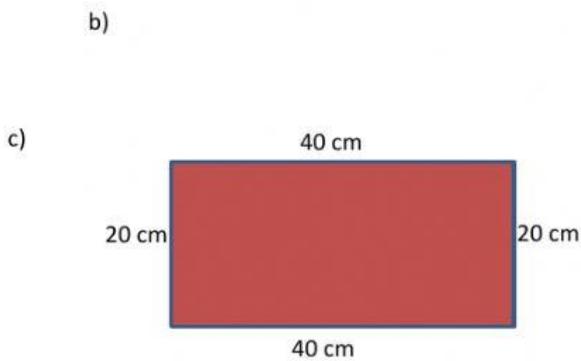

I) Ahora, calcula el perímetro de las siguientes figuras:

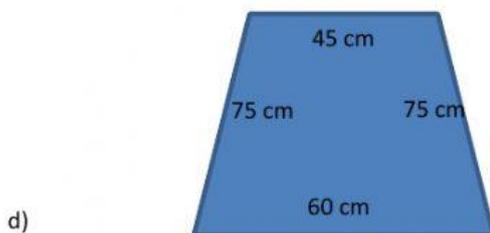

$$P = \boxed{} \text{ cm.}$$

$$P = \boxed{} \text{ cm.}$$

$$P = \boxed{} \text{ cm.}$$

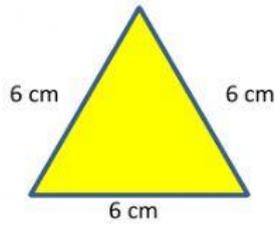

$$P = \boxed{} \text{ cm.}$$

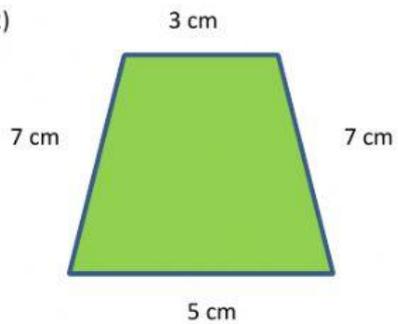

II) Ahora une cada figura con el perímetro correcto:

1)

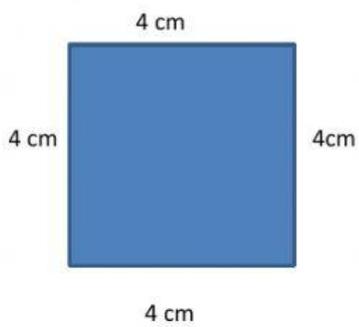

$$P = 26 \text{ cm}$$

2)

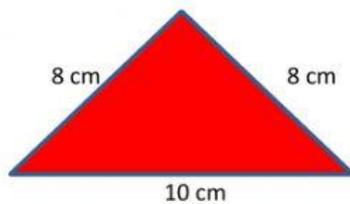

$$P = 16 \text{ cm}$$

3)

$$P = 22 \text{ cm}$$

4)

$$P = 18 \text{ cm}$$
