ALL ABOUT WHALES!

Read the text below and answer the questions about whales!

Whales are mammals! They breathe air like us, the humans. Also, they rise to the surface of the water to breathe. They don't live in cities but in the oceans of the world. Do you know there there are many different kinds of whales? For example, some are the killer whale, humpback whale, and grey whale.

Whales are some of the largest animals! The largest one is the blue whale. It can grow to be a hundred feet long and weigh as much as 15 elephants. It is the largest animal on earth.

Whales leap out of the water. They also dive and roll. Whales dive to get food. Besides, some whales can dive more than a mile down! Also, we can find them in zoos, public aquariums, and entertainment parks. These whales live in large glass tanks. They learn things very easy. They are trained to play with a ball, leap, and dive down deep for different objects.

1.- What type of animals are the whales?

2.- Where do they go to breathe?

3.- Where do they live?

4.- Are whales the largest animals in the world?

5.- Where can we find whales?

6.- Are they free or they live in something?

7.- Can whales learn things? Is it difficult for them?
