

1. If you read 8 pages in a day, how many days will it take you to read 120 pages ?

Solution : -

Number of pages read in a day = 8

Number of days required to read 120 pages = $120 \div 8$
=

8)	1	2	0	(

2. 936 apples were plucked from an orchard in day. They were packed into 12 boxes and sent to the market for sale. If each box contained an equal number of apples then how many apples were there in each box ?

Solution : -

Total number of apples plucked in a day = 936

Number of boxes into which apples are packed = 12

So, number of apples contained in each box = $936 \div 12$
=

12)	9	3	6	(
