

"A DREAM LIFE"

WISHES

READING ACTIVITY

Look at the different people, on the right side you'll find some charts with wishes inside. Match the charts according to the people's personality.

-I considered myself professionally successful but I've been feeling really exhausted lately, I only work 4 days but unfortunately, at night! I wish I worked in the morning so I could sleep more, besides, I never have time to go on dates because I'm always sleepy and feel run down, that's why I'm still single, I wish there were someone who understood my life style and my job.

-Times have changed horribly!!, nowadays people don't believe in anything at all, I wish faith came back for those who stopped going to church or reading the bible. Teenagers commit sins and they don't care, they don't respect their parents, take drugs and misbehave at all times, I wish they could see all the damage they're making to the society and the world. They must go to hell!!

-Before this dangerous virus I used to play videogames in my best friend's house, I hate it so much because I can't go anywhere! I really wish there weren't any Coronavirus all over the world. On the other hand, I have to take classes from home, and I get nothing! I wish Google Classroom didn't exist or at least I wish my parents helped me do my homework, they never have time to spend with me

-As a matter of fact, I had always dreamt about getting married but I never thought it would be like this. My husband works all day and with this pandemic I have to teach my children for free, at least I wish I received the teachers salary! I have to do all the chores myself and the house is always messy because the kids eat and play everywhere, I wish they were at the University now or I wish they were more independent, they're too lazy so I have to be taking care of them at all times.
