

LESSON: 7
TOPIC: Articles with Proper Nouns
TASK: 2 of 3

• **Fill in the gaps with the articles (a/ an, the, -):**

- 1) surgeon Barnard of South Africa was the first to perform a transplantation of the heart.
- 2) music of German composer Bach remained unknown to the general public for almost century.
- 3) theory of conditioned reflexes was worked out by Pavlov,outstanding Russian academician.
- 4) When uncle Podger was trying to hang the picture, it fell on floor and glass broke.
- 5) fat results from the combination of glycerol and fatty acids. It is greasy substance which has organic compound supplying body cells with energy. fat is usually in, soluble in water.
- 6) Visitors to Guggenheim Museum view paintings from spiral ramp that goes from the main level to top of building.
- 7) Rubens, said Simpson, would be taken over toFrance, where it would pass into millionaire's possession.
- 8) He looked at himself in glass. Here, then, was modern Hercules – very distinct from that unpleasant naked figure with plenty of muscles, brandishing a club.
- 9) Can I then say that America I have seen has put cleanliness first, at expense of taste? Aren't you Cicero, talking so finely!
- 10) But it was very subdued Rose who replied. And it was quite frightened Rose who rang bell.
- 11) Just note how different all these composers are – touching Schubert, graceful Mozart, stormy Beethoven! And it is certainly hard to imagine tragic Rossini or light-minded Bach.
