Fraction Review 2

You are encouraged to use a calculator and scrap paper.

If you can't remember how to do something, look back in the Fraction Review virtual notebook or study guide.

1. Simplify: $\frac{12}{20} =$ —

2. Write $\frac{9}{4}$ as a mixed number.   Answer: —

3. Write $2\frac{3}{4}$ as an improper fraction.   Answer: —

4. Add. (Remember to change to like fractions first!) $2\frac{3}{8} =$ ——

$+\ 3\frac{1}{4} =$ ——

————————

——

5. Subtract. $7\frac{1}{5} =$ ——

$-\ 3\frac{2}{5} =$ ——

————————

——

6. Estimate by rounding to benchmark fractions (0, ½ , 1).

$\frac{7}{8} + \frac{4}{9} \approx$ ____ $+$ ____ $\approx$ _____
