

# Comparing states of Water

1. What are some of the characteristics that both the solid and liquid states of water share? And What are their differences?

---

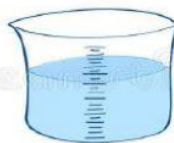

---

2. If we were to leave an ice water bottle in the sun, how would the ice change?

---

---

3. Recognize each of the states of water.

4. Complete the phrase.

The physical states of water are different. Ice has a \_\_\_\_\_ shape, liquid \_\_\_\_\_ its shape to the container it's in and vapor expands, rises and occupies the available \_\_\_\_\_
