

October Monthly Exam
6th grade

Name: _____

Product 2

School: _____ CCT: _____

I. Identify the components of the interview (identifica las partes de la entrevista)

1. _____	<p>Interviewer: Good morning. We are at Jorge Garza School with our guest, an important Ecologist, Mr. Rodrigo Lopez. Good morning Dr. Lopez! Please tell us, what do you think about the use of plastic straws?</p> <p>Dr. Lopez: I think that the use of plastic straws is damaging the environment; these pieces of plastic contaminate the soil and water and sometimes they end up being eaten by sea creatures causing their death; people should care more about the planet, and reduce the use of straws and other plastics.</p> <p>Interviewer: How long does a plastic straw take to decompose?</p> <p>Dr. Lopez: A recent study shows that it takes more than 500 years.</p> <p>Interviewer: Don't you think that plastic straws could be necessary for daily life?</p> <p>Dr. Lopez: Sure!, but they can be replaced for straws made of avocado seeds, bamboo or other organic materials that take less time to decompose.</p> <p>Interviewer: That's a smart option. Thank you for your time Dr. Lopez. Good-bye!</p>	<p>BODY</p> <p>CLOSIGN</p> <p>OPENING</p>
2. _____		
3. _____
