

**H - Circle the correct option.**

**A Dog's Life**

How does a dog's lifespan compare to a human's? Simply multiply the dog's age (1)..... seven and you can see (2)..... it equals in human years. During years one and two of a dog's life, it is still a puppy. It acts like a baby, eats a lot, and has nonstop energy. It also (3).....try things many times before it learns them, just like you. Years three to five are the young adult years. Dogs this age (4).....usually confident, healthy, and strong. Age six to eight marks a dog's middle-age years. They still like to play, be trained, and go for (5).....but may like to relax a bit more, too. By (6).....stage of life, a dog is happily part of your family. If your dog is nine or ten years old, then your pal is really a senior citizen. Senior dogs are sweet and not demanding. They may (7)..... have more health problems. Most dogs this age just like to be by your side and to be petted a lot.

1-	a- in	b- to	c- by
