What is a cell? True or false

1. A cell is the biggest living unit that makes up a living thing.
2. Living things have different numbers of cells.
3. All living things are multicellular.
4. Unicellular living things have many cells.
5. Living things carry out the three life processes: nutrition, reproduction and sensitivity.
6. Most cells can only be seen through a microscope.
7. Tissues form cells.
8. Tissues form organs.
9. Organs form systems.
10. Organisms form systems

2 **What types of cells they are?**

3 **Chose the correct word.**

4 **Write the missing systems.**

a) Giving birth is done by our _____

b) Running is done by our _____

c) Smelling is done by our_____

d) Breathing is done by our _____.

5 **Which life processes is this?**

Cells obtain nutrients and energy from food.

_____

Cells can divide and produce new cells.

_____

Cells react to what they perceive around them.

_____

6 **Name the systems we use to perform each function.**

The digestive system The muscular system The nervous system The circulatory system

The respiratory system The skeletal system The reproductive system The excretory system

a) Reproduction: _____

b) Nutrition: _____

_____

_____

_____

c) Interaction: _____

_____

_____
