Comparing and contrasting photos

*certainly - choose - feel - important - looks - looks like - might -
opt for - overall - problem with*

I'm going to the restaurant in photo 1. It's at school, so it would be very easy to meet up with my friend. It also a cheap restaurant, and that's because I'd be there to talk to my friend about a problem, not to spend a lot of money. The the restaurant in photo 3 is that it's too crowded. It looks trendy and informal, which is good, but it might also be quite expensive. I wouldn't the restaurant in photo 2 because it too formal. It be quieter than the other restaurants, but it wouldn't be cheap. I wouldn't comfortable and relaxed there. So, the restaurant in photo 1 would be best.

Match the adjectives (1–7) with their opposites (a–g).

|---------------|-------------|
| 1 quiet | a trendy |
| 2 bright | b expensive |
| 3 cheap | c lively |
| 4 crowded | d informal |

| 7 traditional | g noisy |
