

SECTION 3 - DIRECTIONS (THE COMPASS)

THE EIGHT INTERMEDIATE POINTS

What are the eight intermediate points of a compass?

In the eight point compass the four main cardinal points are sub-divided to form four new points. These new points are Northeast (NE), Northwest (NW), Southeast (SE), and Southwest (SW). Noticeably, the new points are taken from the cardinal points they fall between.

1. Use these four new points of a compass to complete the compass rose below.
Northeast (NE) Northwest (NW) Southeast (SE) Southwest (SW)

2. Now answer these questions below using your complete compass rose.

- _____ points to the top of the page.
- The direction between north and west is _____.
- The two directions next to east are _____ and _____.
- The direction opposite southwest is _____.
- The direction opposite northwest is _____.
- How many directions are shown on this compass rose? _____
