

Guided Practice

Divide. Use multiplication to check.

$$\begin{array}{r}
 1 \square \text{ R } \square \\
 2 \overline{) 27} \\
 \underline{\square} \\
 \square 7 \\
 \underline{\square} \\
 \square
 \end{array}$$

$$\begin{array}{r}
 \square \square \text{ R } \square \\
 5 \overline{) 59} \\
 \underline{\square} \\
 \square 9 \\
 \underline{\square} \\
 \square
 \end{array}$$

Check: $\square \times 2 = \square$

$$\square + \square = \square$$

Check: $\square \times 5 = \square$

$$\square + \square = \square$$

When you divide a number by 6, can the remainder be 6? Explain.
