

- 4 Read the instructions on how to make a shape net. Number the steps and draw an arrow to show how it is done.

Shape Net

A shape net is a pattern of different shapes. When you fold these shapes in order, they form an object.

Here's how to form a shape net of triangles and squares.

First, fold the top triangle.

Then, fold the bottom triangle.

After, fold the left triangle.

Finally, fold the right triangle.

Can you name this shape? There is a famous monument in Egypt with the same name!
