Name 4 abiotic factors of the desert ecosystem.

_____

Name 4 biotic factors of the desert ecosystem.

_____

!Nara	Grows quickly after the rain. Produce flowers & seeds when there's enough moisture in the soil
Welwitschia	Grow very slow & gets water from fog
Quiver tree	Gives off a resin to coat stem. Bark & leaves store water
Euphorbia	No leaves, green thorns & stem to get sun's energy. Long taproots
8th day grass	Long roots get water from fog, only 2 leaves that are scattered by the wind
Lichens	Irregular stem & thorns protect it from heat by reflecting sunlight
