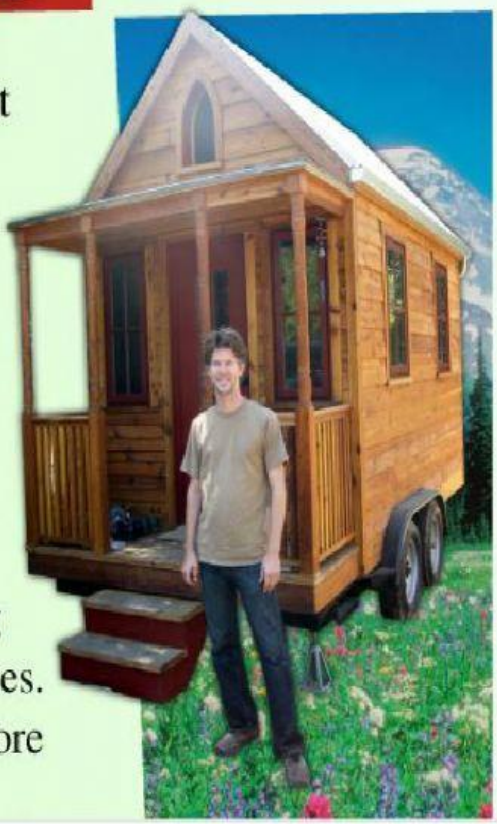
Small Houses-page 37

Read the story and answer the questions

SMALL HOUSES

Jay Shafer builds small houses. Look at this house. There is a bathroom with a toilet, a bedroom and a living room. There is a kitchen with a table and chairs, too. Jay's house is the same size (באותו גודל / بنفس حجم) as a living room. That is very small!



Some people think small houses are good for the environment (סביבה / بيئة). Big houses use more water than small houses. People in big houses sometimes use more electricity (חשמל / كهرباء) and gas (גז / غاز).

Fill in the missing words:

Jay builds _____ houses.

There are _____ rooms in the house.

Small houses are _____ for the environment.

Big houses use more _____, _____ and _____.
