

Oct. 7, 2020
Manaus, Brazil

Dear Saeed,

I have just returned from my adventure to the Amazon rainforest. I have an amazing story to tell you!

We started our adventure from Manaus.

This is a city in Brazil. ¹.....

..... We had many local people helping us travel through the rainforest. They put food in our canoes and started paddling us down the river. We had to climb down a small mountain because the river had a waterfall.

On the first night, we heard a giant "roar" from the rainforest. ².....

..... I opened the door and saw a large jaguar eating some of our food!

One week later, we came to a small village with very good doctors. The doctors use local plants to make very good medicine.

³.....

..... We took notes so we could study the plants when we came home.

On our way home, we almost had a bad accident. We had to cross a small bridge that was across the river. ⁴.....

..... We could not cross. We had to swim across the river using a rope.

I can't wait to see you at the university.

Your friend,

Khalid
