Healthy Eating Plate

Read the following passage carefully and answer the questions that follow-

Food can maintain or save a life. It can destroy life as well. Proper food serves the purpose of medicine.

Improper food works as poison and causes diseases. We may take pride in calling ourselves civilized, but we float all the norms about the quality or quantity of food. We mostly eat processed foods. We have shifted away from Mother Nature. Thus the incidence of diabetes has increased very much. According to a survey, diabetes was rare a few years ago. With the rise of processed and junk foods: the incidence of diabetes has shot up within a very short time. By offering ice-creams, chocolates and cakes too often to our children every other day, we, in

fact, invite obesity and diabetes.

Q1) Write the correct option in the space provided.

1. Food that does not serve the purpose of medicine is called _____ food.

- | | |
