

Portal 4 - Module 3

p. 36-37

1. There is no need to worry because it's a(n) [active / inactive / geological] volcano.
2. Water moves through the [geyser / shoot / channel] and then flows out of the side of the mountain.
3. The children were only allowed to swim in the [rare / active / shallow] end of the pool.
4. Be careful, the food is [boiling / Icelandic / beneath] hot!
5. We left the island when the volcano [erupted / heated / boiled].
6. The best [geology / feature / geyser] of this new car is that you can hardly hear the engine.
7. My grandad said he would give me his collection of [rare / shallow / heated] stamps when I am 16 years old.
8. Little Pete slept [beneath / shallow / barely] his grandfather's big, brown coat.
9. The water is heated inside the earth and when it boils, it [shallows / heats / shoots] up into the air.
10. He likes sitting by the window and [measuring / observing / influencing] the birds' behaviour.
11. Well, I only noticed the lion when you pointed it [at / out / on].
12. We [intend / brighten / measure] to hire another 20 people this year.
13. I was really [rare / patient / impressed] to find out that the writer of that poem was only 13 years old!
14. We arrived at the bus stop at the same time as the bus. What perfect [timing / sample / eruption].
15. There's a lot of [beat / hole / steam] coming out of the pot. The water must have boiled.
16. They saw a seal up [front / into / close] and got to feed it.
17. This books is supposed [at / to / into] be one of the best ever written.
18. The [measurement / sight / produce] of the birds in the sky was very relaxing.
19. Rain is [typical / uncommon / bright] in Antarctica, because it is too cold for rain.
20. The factory [measures / observes / produces] three million pairs of shoes per year.
