

## OPERACIONES COMBINADAS

Lee la siguiente situación y resuelve la operación:

El día domingo compramos 8 helados para la familia, en el camino 4 se derritieron. Por ello, mi mamá salió a comprar 9 helados más ¿Con cuántos helados nos quedamos al final?

A resolver:

a)  $9 + 4 - 2$

A diagram for solving the expression  $9 + 4 - 2$ . The numbers 9, 4, and 2 are written above three boxes. A bracket under 9 and 4 points to a large box. Arrows point from 4 and 2 to a small box and a large box, respectively. A bracket under the large box from the first step and the large box from the second step points to a final large box.

$10 - 5 + 6$

A diagram for solving the expression  $10 - 5 + 6$ . The numbers 10, 5, and 6 are written above three boxes. A bracket under 10 and 5 points to a large box. Arrows point from 5 and 6 to a small box and a large box, respectively. A bracket under the large box from the first step and the large box from the second step points to a final large box.
