

Final TEST

14.Dec.2018

Name:

Surname:

➤ Drag and drop the correct answer

sensor

Device that tell you what happen

LED

Reduce resistance as light increases

actuator

Able to read inputs and turn it into output

Arduino
board

A device that converts energy in environment

LDRs

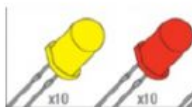

➤ Join the correct answer by arrow

1

push button

2

330 Resistor

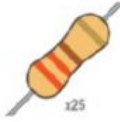

3

Environment

Integrated Development

4

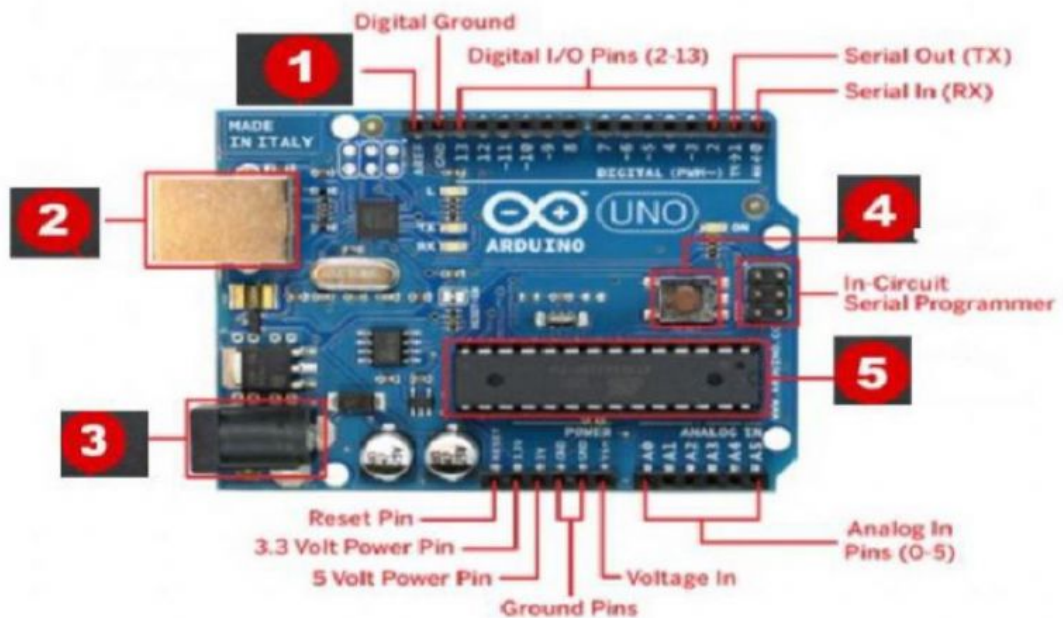

110 Resistor

5 The software used to create Arduino sketches
Diod

Light Emitting

➤ Join correct answer by arrow

- ATmega 328 Microcontroller
- External power supply
- USB plug
- Analog reference pin
- Reset button
