✿ READ THE TEXT AND ANSWER THE QUESTIONS.

Mr James Scott has a garage in Silbury and now he has bought another garage in Pinhurst. Pinhurst is only five miles from Silbury, but Mr. Scott cannot buy a telephone for his new garage, so he has bought twelve pigeons. Yesterday, a pigeon has carried the first message from Pinhurst to Silbury. The bird has covered the distance in three minutes. Then, Mr Scott has sent a lot of urgent messages from one garage to the other, so he has created his own private "telephone" service.

- Has Mr. James bought a new garage?
- What has he bought then?
- Where has the pigeon gone yesterday?
- How long has the bird taken to cover the distance from Pinhurst to Silbury?
- How many urgent messages has he sent?
- Why has Mr Scott created his own "telephone" service?
