Recently, I have read a very interesting Teens and Tweens magazine. There are many activities teens love doing which are very different from those we adults used to do when we were their age!

As kids, we all liked playing, \_\_\_\_\_ trees or running along with

friends, yet as we grew up, many of us decided on sports that might be considered more moderate, such as golf. This a game in which we use long sticks called clubs to hit a small, hard ball

into holes that are spread out over a large area of grassy land. So, it implies \_\_\_\_\_ the land towards wherever the ball has fallen and \_\_\_\_\_. We do exercise in a very safe way!

However, these new generations, called the "centennials" and "millennials" seek thrilling experiences. They enjoy playing football. They love \_\_\_\_\_ the ball and trying to do it professionally too. Many

teens look for even more exciting activities. They are enthusiastic about \_\_\_\_\_ mountains and rocks.

Others like travelling to the beach and when they do so, they normally shoot the very same photo! They \_\_\_\_\_ and snap the moment they are on the air. They all have the very same pic!

Last but not least, there are those who like going through new and bizarre experiences; for example \_\_\_\_\_ a bed of nails!

Well, what I have noticed is that we can learn many new things from our Teenagers! And new activities we didn't even know they existed!
