

In order to keep healthy, we need to (**play / exercise / hide**) both our mind and body. It's easy to think of ways to exercise our body, but what about our mind?

Research (**show / shows / showing**) that if we (**keep / stay / bring**) our minds healthy there are many benefits: we usually have more (**energy / biology / ecology**) and we can use this in the activities we are doing; we are more focused so we can concentrate (**good / better / best**) on a task; we are more alert so we can respond more appropriately (**for / from / to**) a situation; we are less stressed, so we can learn better.

If we have a healthy mind, we feel good about (**yourself / themselves / ourselves**). We (**shout / call / scream**) this mental well-being. Being positive and feeling happy is part of well-being. If we are positive, the people (**over / under / around**) us are more likely to feel positive too.

There are many ways to improve our mental health and well-being. Here are just a few. Which ones do you think would be the best for your well-being? Add your own ideas.
