Quizlet

A game-based classroom response system, where teachers can create quizzes using Internet

It lets students learn and improve by studying with flashcards, games and more.

Engaging exercises and games that engage students using smartphones, laptops and tablets.

Teachers can create a feedback poll or ask questions. Students respond in various ways and teachers see the results in real-time.

An interactive video and assessment tool that allows teachers to add formative assessment features (pauses and questions) to survey what students know about the topic.
