Listen to the conversation, fill in the gaps and answer the questions

Dentist: Hmm, I can see you have a slight malocclusion.

Patient: Sorry, I'm not sure what that means.

Dentist: It means you have a problem with your 1 .

Patient: Oh, you mean they're 2 ?

Dentist: Yes, and as a result, you've got a 3 . We really need to treat it.

Patient: I don't want to wear braces! My teeth are only slightly crooked. It's not a 4 I don't mind.

Dentist: We really need to fix it. It's not just a matter of 5 . Bad 6 can affect your dental health.

Patient: Really? How?

Dentist: It makes the teeth hard to clean and so you're more likely to get tooth decay. You may also get headaches and back pain if you don't treat it.

Patient: Oh, I see. So what happens now?

Dentist: You need to book an appointment with our orthodontist. Don't worry, you'll be fine.

The woman is suffering from underbite

The woman does not want to wear braces

The woman will probably book an appointment with an orthodontist
