

Name: _____

Date: _____

6 Kingdoms of Life Test

Directions: Circle the correct answer

1. Which two kingdoms have no nucleus?
 - a. protist and archaeobacteria
 - b. plant and animal
 - c. eubacteria and archaeobacteria
 - d. fungi and protist
2. Which kingdom of life makes its own food through the process of photosynthesis?
 - a. animals
 - b. plants
 - c. fungi
 - d. protists
3. Which kingdom of life absorbs decaying and dead material?
 - a. plant
 - b. fungi
 - c. eubacteria
 - d. animal
4. Which kingdom do humans belong to?
 - a. plant
 - b. animal
 - c. monkey
 - d. archaeobacteria
5. Which kingdom do mushrooms belong to?
 - a. plant
 - b. animal
 - c. monkey
 - d. archaeobacteria
6. Which kingdom do roses belong to?
 - a. plant
 - b. animal
 - c. monkey
 - d. archaeobacteria

7. What invention lead to the discovery of bacteria?

- a. microscope
- b. telescope
- c. thermometer
- d. hand sanitizer

8. How many kingdoms of life are there?

- a. 2
- b. 5
- c. 112
- d. 6

Directions: Place the kingdoms of life in order from simplest organisms to most complex

Animal	Fungi	Eubacteria
Protist	Archaeobacteria	Plant

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____
