### 6 Kingdoms of Life Test

**Directions: Circle the correct answer**

1. Which two kingdoms have no nucleus?
  - a. protist and archaeabacteria
  - b. plant and animal
  - c. eubacteria and archaeabacteria
  - d. fungi and protist
  
2. Which kingdom of life makes its own food through the process of photosynthesis?
  - a. animals
  - b. plants
  - c. fungi
  - d. protists
  
3. Which kingdom of life absorbs decaying and dead material?
  - a. plant
  - b. fungi
  - c. eubacteria
  - d. animal
  
4. Which kingdom do humans belong to?
  - a. plant
  - b. animal
  - c. monkey
  - d. archaeabacteria
  
5. Which kingdom do mushrooms belong to?
  - a. plant
  - b. animal
  - c. monkey
  - d. archaeabacteria
  
6. Which kingdom do roses belong to?
  - a. plant
  - b. animal
  - c. monkey
  - d. archaeabacteria

7. What invention lead to the discovery of bacteria?

- a. microscope
- b. telescope
- c. thermometer
- d. hand sanitizer

8. How many kingdoms of life are there?

- a. 2
- b. 5
- c. 112
- d. 6

**Directions: Place the kingdoms of life in order from simplest organisms to most complex**

Animal	Fungi	Eubacteria
Protist	Archaebacteria	Plant
