C. THIS STORY WILL HAPPEN IN THE FUTURE. IT IS ABOUT JAMES. TURN IT INTO THE FUTURE.

In the future people don't work . James uses robots for that. Children don't go to school, so James learns on the internet in virtual internet classroom. He doesn't use pens and pencils. He doesn't write into notebooks he uses his mind power to make words appear on tablets. He talks to their teachers only on the internet. He doesn't take any tests. He meets his friends in virtual word in virtual chat rooms where they talk about interesting things. At home robots cook and they clean, so James has time to do sports in a special room, or he reads internet books or he talks to their friends on the internet. Shops disappear because people think about things they need and they appear in front of them. A lot of them turn into couch potatoes because they don't take any exercise. The air is not so clean anymore because of pollution. Life looks easier. But is it really?

D. LISTEN TO THE BEGINNING OF JOAN'S LIFE STORY, THEN CONTINUE IT IN YOUR OWN WORDS. USE THE CUES BELOW. Use your lovely little notebooks.
