

"Who do you share your details with?"

One Direction Parody Song

Listen and drag the verses to the correct place:

We've got some headlines for you guys

Too many photos on your wall

Out to people that you've never met

Chorus:

All your friends sharing your information secretly

Who do you share your details with?

Show what you're reading

Unless you know them

You don't know

Listen to us

It could be spamhaus

Friends met online

Without thinking of the dangers

And Oh something personal

You share your number, name and address

Everyone else knows your details

You're insecure

Don't know what for

Everyone else in the world can see you

You don't know

Who do you share your details with?

Don't share your number or tell them where you live

Do you know what you're sharing and who can see?

Tell a parent a teacher

They're there to help

Tell someone else

Don't reveal things about yourself

Trying to hack your newsfeed

All that you read

Are just strangers

Don't believe

Don't give your info

All those smart kids

Keep their profiles private

You should hide it
