

Scrivi sui lati dei poligoni tutte le misure mancanti, poi calcola le aree e i perimetri dei rettangoli e dei quadrati.

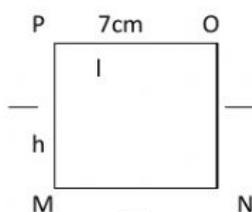

$A = l \times l = 9 \times 9 = 81 \text{ cm}^2$

$P = l \times 4 = 9 \times 4 = 36 \text{ cm}$

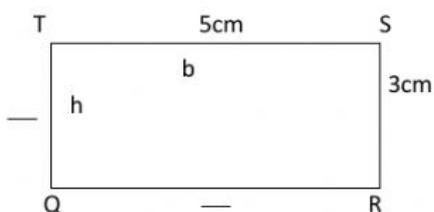

$A = \quad = \quad = \text{cm}^2$

$P = \quad = \quad = \text{cm}$

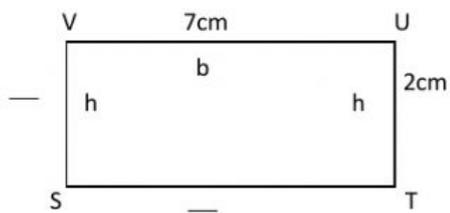

$A = \quad = \quad = \text{cm}^2$

$P = \quad = \quad = \text{cm}$

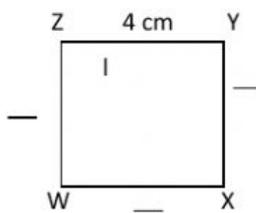

$A = \quad = \quad = \text{cm}^2$

$P = \quad = \quad = \text{cm}$

$A = \quad = \quad = \text{cm}^2$

$P = \quad = \quad = \text{cm}$

$A = \quad = \quad = \text{cm}^2$

$P = \quad = \quad = \text{cm}$
