Part 4
Reading

Read the passage and answer the following questions.

There are a lot of environmental problems nowadays, mainly because of pollution. It is the contamination of air, water and soil by different materials that interfere with human health and quality of life.

The emissions from factories and engines, including cars are the big causes of air pollution and simple things that we do at home, like using aerosols, have bad effects on the ozone layer, which protects life on Earth from ultraviolet radiation.

Water is also suffering from pollution because of domestic, municipal and industrial waste.

It is time for us to stop damaging the environment. We all should be environment friendly!

1. What is the biggest enemy of the environment?

→

2. What are the big causes of air pollution?

→

3. Do aerosols have positive effects on the ozone layer?

→

4. What is the function of the Ozone Layer?

→

5. Why is water suffering from pollution?

→
