

Name : _____

Class : 4 UNIVERSE

Topic : AREA OF SHAPES

Length X Width =
 $6 \text{ cm} \times 6 \text{ cm} = 36 \text{ cm}^2$

Length X Width =
 $5 \text{ cm} \times 3 \text{ cm} = 15 \text{ cm}^2$

(Length X Width) $\div$ 2 =
 $(10 \text{ cm} \times 4 \text{ cm}) \div 2 = 20 \text{ cm}^2$

Find the area.

1)

length X width =
cm X cm = cm^2

2)

length X width =
cm X cm = cm^2

3)

length X width =
cm X cm = cm^2

4)

(length X width) $\div$ 2 =
(cm X cm) $\div$ 2 = cm^2
