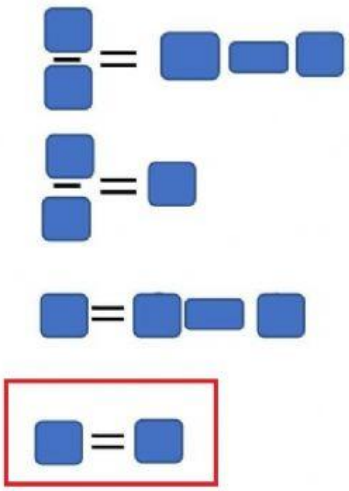
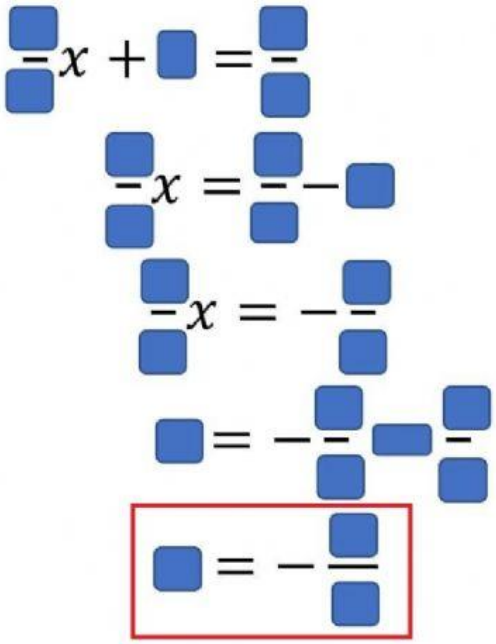
3)Resolvemos ecuaciones con una incógnita y trabajamos con números enteros y racionales

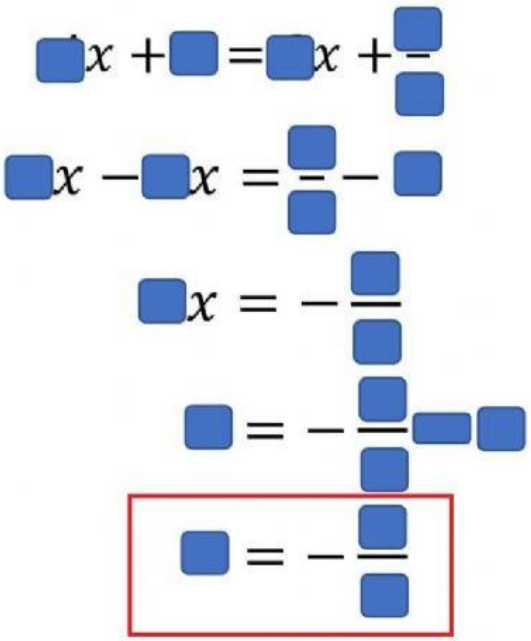
16) $\frac{x}{4} + 8 = 10$

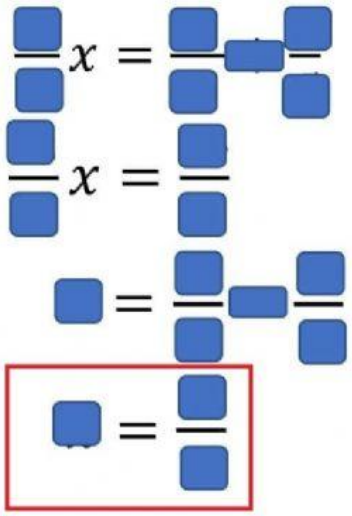


17) $\frac{2}{5}.x + 3 = \frac{1}{2}$



18) $4.x + 5 = 2.x + \frac{4}{5}$





19) $\frac{12}{5}x - \frac{4}{5} = \frac{2}{15}$
