- add your name to a list of people who are asking the government to do something _____
- successfully challenge a person or organisation in court _____
- rules that people and businesses must follow which protect the land, sea and air _____
- try to change a situation using lawyers _____

2 Read the article. Match headings a–e with paragraphs 1–4. There is one extra heading.

- Other ways the organisation helps
- Victory for four green teens
- Future plans
- Why was the victory so important?
- The organisation that supported them

3 Read the article again. Choose the correct answers.

- The Global Warming Solutions Act
 - tried to stop all greenhouse gases immediately.
 - was rejected by the government in the 1990s.
 - tried to reduce greenhouse gases all over the USA.
 - made a lot of people angry.
- Why was this an important win?
 - It was the first victory against the state government since 2008.
 - Because it means the state must now clean up the air.
 - Because it means the state must now reduce energy costs.
 - Because it was the first court case about the environment.
- Our Children's Trust
 - is a government organisation.
 - trains young people to become lawyers when they're older.
 - educates and supports young people who want to take legal action.
 - thinks not many young people care about the environment.
- What do the people at Our Children's Trust believe?
 - We can't wait any longer to save the environment.
 - Children cause environmental problems.
 - No governments are taking any action.
 - The Global Warming Solutions Act isn't good enough.

**Teenagers against climate change**

1

Four teenagers in the USA have recently won an important court case against the Massachusetts state government to make them reduce greenhouse gases. The 2008 Global Warming Solutions Act says that all state governments must reduce greenhouse gases by 20 percent. In 2012, the Massachusetts state government hadn't done anything and so hundreds of young people signed a petition. The Massachusetts state government still didn't do anything, so the teenagers took the state government to court. The teenagers lost their first court case, but last week another judge decided that the state government was wrong and it must now improve traffic and use more renewable energy.

2

The teenagers were working with Our Children's Trust, an organisation which uses legal action when local governments don't follow environmental laws. The organisation was started in Oregon in 2011 and they encourage and train young people to get involved in environmental change. Our Children's Trust knew that the biggest supporters of action against climate change are usually young people and so they wanted to help make their voices heard by governments who were not doing enough.

3

The organisation believes that we must act against climate change urgently, so that the children of the future can have a clean and safe world to live in. They are involved in lots of similar cases with other state governments at the moment. They also make short films to educate people about the environmental problems we face in the world today.

4

The victory in Massachusetts was a huge success, not only for the state, but for young people in general, as it has shown that young people really do have a voice. Governments cannot sit and do nothing anymore when people are polluting the air.

READING and VOCABULARY

So you want to be an astronaut?

I can understand specific detail in an article.

1 Match words/phrases 1–8 with definitions a–h.

- | | |
|---|---|
| 1 ☐ attend | 5 ☐ 20/20 vision |
| 2 ☐ space camp | 6 ☐ weightless |
| 3 ☐ pilot's licence | 7 ☐ mission |
| 4 ☐ training programme | 8 ☐ simulate |
- a the ability to see clearly, without glasses
 b be present at (an event)
 c an important job that involves travelling somewhere
 d the qualification you need to fly a plane
 e replicate the appearance or character of something
 f a course of studying practical skills
 g having little weight because there is no gravity, e.g. in space or under water
 h a place where you stay in the summer and learn about space

2 Read the article. Put the topics a–f in the order they are mentioned.

- | | |
|--|--|
| a ☐ professional requirements | d ☐ training |
| b ☐ how difficult it is | e ☐ physical requirements |
| c ☐ work on the ground | f ☐ academic requirements |

3 Read the article again. Choose the correct answers.

- 1 Which of the following do you need to become an astronaut?
 a academic qualifications
 b physical requirements
 c work experience
 d all three of the above
- 2 What's the minimum academic requirement to become an astronaut?
 a a PhD
 b a university degree
 c a school diploma
 d a pilot's licence
- 3 Why is it important to be very healthy?
 a Because it would be a big problem if you got ill in space.
 b So you can cope with the training.
 c Because you have to be strong to fly a spacecraft.
 d So you weigh less on the spacecraft.
- 4 What happens after you graduate as an astronaut candidate?
 a You go straight on to a space mission.
 b You do several years' more training.
 c You do several weeks' more training.
 d You take an exam.

So you want to be an astronaut?

Becoming an astronaut isn't easy. If you want to go into space one day, you'll have to spend many years training, studying and becoming physically fit and that's just the beginning. Only a small number of people who apply will successfully become astronauts.

The first step is getting a university qualification. NASA requires at least a first degree in Engineering, Science or Maths. But if you really want to succeed, you'll get a Master's or even a PhD. Attending space camp when you're a teenager helps too.

That's only the start. There are other requirements. You also need at least three years' professional experience in something similar (e.g. flying a plane with a pilot's licence). Alternatively, NASA also look for people who have worked as teachers.

You also need to be physically fit, with 20/20 vision, normal blood pressure and be between 157 and 190.5 cm tall. It's important

that you're healthy, because if you became ill in space, it would be very expensive to bring you home for a medical emergency.

If you are selected, you'll begin a two-year training programme as an 'astronaut candidate'. You spend your time scuba diving, learning Russian, training in a weightless environment and many other things. Part of this training involves going up in the 'vomit comet', a special aeroplane which flies up and down to simulate weightlessness (and often makes people sick!).

If there are no problems, it will be many years before you are chosen to go on a mission. During this time, you'll do more training and work on the ground, helping with missions already out in space.

Becoming an astronaut takes a lot of hard work, patience and determination, but if you're lucky, you'll become one of the few people to see Earth from space!

An amazing rescue

On 11 April 1970 Apollo 13 flew into space from Florida, USA. If the mission ¹ was successful, Apollo 13 would have been the third manned spacecraft to land on the moon. However, after two days, there was an explosion. If an oxygen tank ² hadn't exploded, the spacecraft would ³ have landed on the moon. But instead, the mission stopped and the spacecraft orbited the moon instead. The flight director, Gene Kranz, wanted to use the moon's gravity to push the spacecraft back to Earth. If he hadn't ⁴ made this decision, the astronauts ⁵ wouldn't have survived. One of the biggest problems of the return journey was removing carbon dioxide from the spacecraft. If engineers on Earth ⁶ hadn't invented a system to do this quickly, the astronauts wouldn't have ⁷ been able to breathe. Finally, on 17 April, the astronauts returned safely to Earth.

- a was b were c had been
- a hadn't b wouldn't c would
- a had b haven't c have
- a make b made c making
