

**A** Connect each force of nature to a cause and two effects.

**Force of Nature**

**1 Earthquake:**

Earth's plates suddenly release energy.

**2 Hurricane:**

Warm ocean air forms a storm.

**3 Tornado:**

Warm air starts to spin.

**4 Blizzard:**

Heavy snow falls. Strong winds blow.

**First Effect**

**a** The storm grows and reaches land.

**b** This spinning air reaches the ground.

**c** Snow covers the roads.

**d** This energy moves the ground.

**Second Effect**

**e** Buildings and objects shake.

**f** Drivers can't see and are not safe.

**g** Trees fall and floods happen.

**h** It destroys everything in its path.

**B** Answer the questions.

**1** Why is a tsunami so dangerous?

**2** Which has stronger winds, a hurricane or a tornado?

**3** What kinds of warnings can people receive?
